My expertise: CRM, Product Management, Cybersecurity, Scrapping, ERP, ETL, SaaS, High-load apps, Digital Transformation, Data Science, Blockchain, Integration with 3rd-party applications and services

Industries: Healthcare (Salesforce CRM), E-learning, Fintech, Cryptocurrency, Social Media, Retail, AdTech, etc.

Services

Ecommerce and marketing platforms

I have worked on various ecommerce and marketing platforms and am pretty much familiar with discounts (vouchers, offers, buyer club), multi-currency support and cross-country taxation, social media integration etc.

Complex e-shops and Point of Sale

I can build solutions for sales via online shop or/and POS in the offline store, allowing to use same inventory.

B2C and B2B marketplaces

I've been working on B2B multi-vendor marketplaces with wholesale pricing systems and complex dashboards, per-vendor shipping and real-time chat for conversation between buyer and vendor.

Booking systems

I worked on booking systems for hospitality domain and photo-equipment rental and know how to determine room availability for a given date range or sign rental insurance agreement.

Business processes automation

If you are looking to automate your business processes and none of existing solutions suit you — we can implement a custom solution for CRM, ERP or paperless workflow.

Django-Oscar commercial support

Django-Oscar is a powerful open-source ecommerce framework on top of Django.

Experience

Byprice / Senior Software Developer

August 2020 - November 2021

I was working with Byprice as a Senior Software Developer. We were using Flask as our Main programming framework. We developed byprice.com which is one of the largest successful services for delivery Medical Drugs and services.
